## Ph.D students

---

If you wish to undertake your Doctorate at the University of Tours, you must hold a Master or equivalent Degree.

Doctorate preparation is normally carried out over three years. Under certain conditions, however, you may benefit from a longer preparation period. This must be applied for each year. Admission is granted by the President of the University, following approval from the Director of Theses and after proposal from the Director of the Doctoral School.

The work is carried out under the responsibility of a professor and a director of theses, with whom you determine the title of your thesis subject.
